ABSTRACT

This book focuses on the design process and aims to teach students basic design technology with applications in their school and environment. Contents are divided into six chapters: (1) "Appetizers" includes activities that can be done individually to become familiar with the topic of design; (2) "Concepts" provides a basis for design development; (3) "Activities" features activities and classroom projects; (4) "Stories" presents teacher narratives on design; (5) "Resources" provides resources for the implementation of the activities; and (6) "About Standards" describes the standards addressed in math, science, technology, social studies, and English language arts. (Contains 57 references.) (YDS)
